

EXPERIENCE THE BUTLER DIFFERENCE.

Butler Manufacturing Company offers several competitive advantages that have enabled us to remain the leader in the building systems industry for more than 100 years. We call this The Butler difference, and you'll find it in details such as—

Butler Builders®—offering single-source responsibility and complete construction services. Find your local Butler Builder® at www.butlerbuilder.com.

High-performance products—such as acrylic-coated galvanized C/Z purlins and girts,

the unique MR-24™ seam that virtually eliminates roof leaks, and structural and wall systems that integrate easily with conventional building materials.

Butler-Cote™ coating—only Butler offers this superior full-strength Kynar 500® or Hylar 5000® fluoropolymer finish system as the standard exterior finish on all painted panels and trim.

Weathertightness warranties—available 25-year warranties for perforation protection and weathertightness are a testament to the performance that a Butler® building system offers.

BUILDING IN A NEW LIGHT™

RESTAURANT AND BANQUET FACILITIES

A BUILDING THAT PERFORMS

Whether you're building a new restaurant or banquet facility it must be attractive, yet easy to maintain. You need the highest quality of appearance, design, and construction with the lowest investment of time and money. Because your customers want it all. They want fast and efficient service in an attractive and comfortable environment.

A Butler® building system enables you to create the ideal image for your business with an array of attractive exterior options. It offers unlimited flexibility with regard to interiors as well. So you can carry the inviting atmosphere throughout every corner of your facility.

When you consider that a Butler building system can also be built faster than is typical with conventional construction, it's easy to see why it has become such a popular choice for restaurant and banquet facilities of all sizes and designs.

FLEXIBLE DESIGNS

Butler restaurant and banquet facilities offer unmatched flexibility. Interior walls can easily be moved to make room for more equipment and dining space as your business grows. If you wish, your building can be designed without interior

columns. The unobstructed interior is ideal for themed restaurants where your message is intended to be visible from all points in the facility. And if future expansion is in your plans, you'll find a Butler® building system readily accommodates it.

BEAUTY IS REFLECTED IN EVERY DETAIL

The appearance of your new building is a critical factor. When you build with Butler, you can be confident you'll receive a restaurant or banquet facility that is solid, attractive and welcomed by the community.

Exteriors of wood, brick, stone, glass, or stucco are just as familiar to us as our attractive and economical metal wall systems.

Your customers will appreciate the beauty and quality of your Butler building from the inside and out.

PROTECTING YOUR LIVELIHOOD

Keeping your customers and assets protected from the elements is naturally of utmost importance. So it's good to know that Butler building systems have been tested by Butler research specialists and proven to perform in tens of thousands of applications around the world.

For example, our MR-24™ standing-seam metal roof system can be guaranteed weathertight for up to 25 years—and it routinely outlives its warranty. You'll save every year on roof maintenance costs, resulting in significant lifecycle savings.

COST-EFFECTIVE CONSTRUCTION IS ASSURED

With a Butler building system, the structural frame, the roof and even the walls of your new building are designed by experienced Butler engineers. This saves you planning time and engineering design costs. And with our extensive capabilities, Butler can design for any budget.

Butler systems, designed for precision assembly without expensive field work and on-site modifications, allow for quicker construction times. A design-build solution from your local Butler Builder®, can add further efficiencies by eliminating multiple parties and streamlining the delivery process. You will be able to move into your new building sooner—with lower initial construction costs and lifecycle costs.

INTEGRITY MEANS EVERYTHING

Butler is known for its design integrity in the building systems industry. We go to great lengths to assure that our buildings are certified to the highest design and manufacturing standards and comply with all applicable codes. You can also take comfort in knowing that all Butler products are thoroughly tested to assure consistently superior quality.

With a Butler building system, you have a secure facility that you can put your confidence in today and for years to come.

A BUILDER YOU CAN TRUST

Your Butler Builder® is a construction professional who can handle every phase of your construction project. Only builders of the highest integrity and reputation are selected to become Butler Builders®. They will work with you to provide the building system you want, on time and within your budget.
